Girbau Industrial releases new Chest Ironing System

Oshkosh, Wis.-- Girbau Industrial's new PC-120 Flatwork Ironer delivers unmatched performance, durability and efficiency. Engineered to meet the needs of high-volume laundries, the PC-120 – available in natural gas, steam and thermal fluid – features advanced programmability while producing a superior finish in less time. The PC-120 Flatwork Ironer finishes up to 164 feet of linen per minute!

Designed to meet the needs of a variety of high-volume laundry applications, the PC-120 comes available in 118-, 130- or 138-inch finishing widths with up to three, 48-inch diameter rolls. The new natural gas model delivers 93 percent efficiency! The natural gas model is engineered with an integrated boiler that allows the ironer to instantly adjust ironing parameters according to productivity needs, ironing speed, linen moisture and linen type. Unlike the steam models, the PC-120 in natural gas does not require external boilers, which cuts installation and maintenance costs, as well.

All PC-120 models – in steam, natural gas and thermal fluid – are highly programmable. They feature the Inteli Control, which delivers complete control over every ironing parameter, including ironing speed, bed temperature, AutoSpeed® and roll pressure. Simple to use, the Inteli Control allows for up to 49 different ironing programs to meet the specific needs of a variety of items and applications. Using the PC-120, laundries can quickly process a variety of items – pillowcases, sheets, duvets, tablecloths, robes, napkins, hospital gowns, and more – simply by entering a program number and pressing start.

Engineered with AutoSpeed®, PC-120 Ironers properly finish items without dryer conditioning – boosting productivity and reducing labor hours. This patented feature automatically adjusts speed variables to properly dry and finish all types of linen. As linens pass through the ironer, AutoSpeed® adjusts ironing speed and temperature according to fabric type and moisture content. This feature eliminates temperature fluctuations, assuring consistent, quality finishing and even drying.

The PC-120 is designed with an extensive fluid-flow area for unmatched heat transmission to linens and features an S-Coil bed design for uniform heating throughout the entire ironing surface. Designed for safety and years of long life, the ironer bed is machined after welding, tested to a pressure of 20 bars, and mirror-polished. Engineered with a rigid chest design, these ironers provide unmatched results.

In order to ensure appropriate ironing pressure across the bed's surface, perforated cylinders allow for maximum suction and humidity removal, while a heavy-duty SPRINGPRESS spring system delivers consistent pressure against fabric. As linens pass through the ironer, extractor fans located at each cylinder shaft pull moisture away from fabric.

Designed to be operator friendly and safe to use, PC-120 Ironers feature critical safety features to prevent accidents. A fixed tray for item feeding ensures operators are a safe distance from the machine. Other safety features include, safety guards, safety handrails, emergency stop, automatic cool-down, electrical circuit safeguard and independent switch disconnect.

Built for durability and long life, the PC-120 Flatwork Ironer is backed by an industry leading, 3/5-year manufacturer's warranty and a 7-year warranty on the chest. To find out more, visit www.girbauindustrial.com, or call 1800-256-1073.

One of three brands of Continental Girbau, Girbau Industrial provides industrial laundry products to North American clients, including large-capacity washer-extractors and drying tumblers, high-volume flatwork ironers, tunnel washing systems, presses, feeders, folders, conveyor systems and related system machinery.

Continental Girbau Inc. is the largest of nine subsidiaries of Girbau S.A., based in Vic, Spain. Girbau S.A. laundry products – marketed throughout 80 countries worldwide – meet

rigorous environmental and safety standards established by the International Organization for Standardization (ISO). Girbau S.A. holds both ISO9001 and ISO14001 certifications. Ever focused on laundry efficiency, Continental Girbau is a member of the U.S. Green Building Council (USGB), a 501(c)(3) nonprofit that developed the Leadership in Energy and Environmental Design (LEED) Green Building Rating System.
