Continental's new 60-pound capacity ExpressWash® Washer now available

Oshkosh, Wis.—Continental Girbau Inc. (Continental) recently added the 60-pound capacity ExpressWash® Washer to its comprehensive line of freestanding, high-speed washers engineered to deliver a 60-minute wash/dry/fold. The ExpressWash line now features 20-, 30-, 40-, 60- and 90-pound capacity models – all equipped with the advanced ProfitPlus® Control.

The new 60-pound capacity ExpressWash Washer replaces its 55-pound capacity predecessor with bolstered capacity, design enhancements and greater G-force extract, which is programmable up to 400 G-force. “Larger washers are in demand because vended laundry customers love them,” said Joel Jorgensen, Continental vice president of sales and customer services. “While the new 60 offers the same compact footprint as its 55-pound capacity predecessor, it provides greater basket capacity for more productivity per square foot.” An improved design makes for simpler installation and serviceability.

Like all ExpressWash Washers, the 60-pound capacity model ensures self-service customers complete laundry in 60 minutes or less. Meanwhile, vended laundry owners benefit from the washer’s durability, programmability and profit potential, according to Jorgensen.

ExpressWash Washers boast a unique suspension system and freestanding design that combine for simple installation and extract speeds reaching 400-G force. The super-speed extract removes more water from each load—reducing dry time by up to 50 percent. Customers finish laundry – wash, dry and fold – in less than 60 minutes. Vended laundry owners cut utility overhead costs, improve customer turnover and bolster profits.

The washer’s ProfitPlus® Control helps set vended laundries apart by offering customers more control over the laundry process. It features SUPERWASH, an extra-long cycle for heavy soil; HOT, for whites; WARM for colorfast and permanent press items; and COLD for colors. It also allows the customer to add an EXTRA WASH, EXTRA RINSE and/or DELICATE CYCLE. ProfitPlus gives customers more control over how laundry is washed – helping set vended laundries apart from their competition.

Additionally, the highly programmable control allows vended laundry owners to lower water, natural gas and electricity usage – cutting operational costs. The ProfitPlus Control offers

four individually modifiable programs that allow programmability of G-force extract, mechanical action, wash temperature (by degree), water levels and wash/rinse/extract time in each phase. The control's flexibility allows multi-level vend pricing on the same machine depending on the wash program selected, time of day, or day of the week. Owners can also program variables within the EXTRA WASH, EXTRA RINSE and DELICATE CYCLE options, including the extra wash or rinse time in minutes, the addition of another bath, vend price and G-force extract speed.

Moreover, ProfitPlus integrates networking, remote programming and payment-system interface to make quick programming possible. In seconds, from a remote smartphone or computer, owners can configure pricing and specials, run reports, schedule routine maintenance flushes, and monitor the status of the system and equipment in real time.

Stingy on water, ExpressWash Washers feature a sump-less design – saving up to 3 gallons of water with each fill. AquaFall and AquaMixer systems further curb water usage. AquaFall releases water into the load via holes in the drum lifters. As the drum turns, lifters release water from above to better penetrate fabric. Most other frontloads use lifters to simply drop fabric into a pool of water at the bottom of the washer drum. With ExpressWash, laundry is saturated from above and below. This unique system cuts water usage and rinse cycle times while improving the quality of the wash. AquaMixer further improves efficiency by mixing hot and cold water before entering the drum. This achieves very precise water temperatures—offering greater control over hot water consumption.
