

**Introducing
Extra Sanitize!**

Exceed Customer Expectations ProfitPlus Control Upgrade Kit with 'Extra Sanitize'

For the first time, the ProfitPlus Control upgrade kit with 'Extra Sanitize' makes it easy to interface with, and monetize, new and emerging laundry sanitization practices that are in demand by consumers. In doing so, whenever a customer selects the "Sanitize" option, an owner-specified cost is added to overall vend price.

- Owners can set their laundries apart from the competition - be first to sanitize!
- Comply with rigorous cleaning and health guidelines.
- Ensure the safety of employees and customers.
- Maximize revenue and customer retention.
- Upgrade one machine, a bulkhead or your entire store.
- Easy installation: The kit, which takes 15 minutes to install per washer, includes a firmware download, new overlay with 'Sanitize' option, and clear installation and programming instructions.

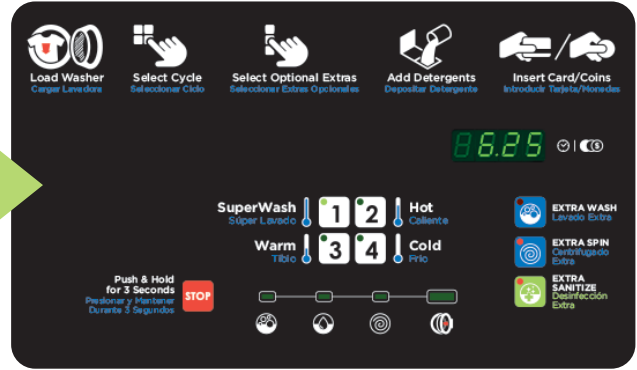

No Continental Girbau customer left behind. The ProfitPlus® Control upgrade kit with 'Extra Sanitize' is available for use on vended Continental washer-extractors manufactured after 2009.

Integrating the Sanitize Kit

Do you have the standard ProfitPlus Control?

Upgrade and Monetize with the ProfitPlus Sanitize Kit!

Steps for integrating the new control kit are simple, both for laundries already using sanitizing ozone storewide; laundries using automatic chemical injection systems; and for those interested in sanitization of laundry options:

- **Step 1** – Contact your Continental equipment distributor to order the upgrade kit. They will assist you with questions and installation, if needed.
- **Step 2** – Add the ProfitPlus upgrade kit to washers with a simple overlay, firmware install and reprogramming.
- **Step 3** – Configure the control to add a dosing signal for sanitizing chemical or sanitizing ozone injection. You'll need to add a sanitizing chemical or ozone to each washer if you don't already have it. If you already have storewide ozone, we suggest increasing the ozone exposure/cycle time and or rotation action when the "Sanitize" option is selected. This immediately monetizes the "Sanitize" feature. Or
- **Step 4** – You can opt to add a third water inlet for pre-ozonated water when the customer selects 'Extra Sanitize' for the vend premium.

Options to Sanitize & Monetize

- **Option #1 – Existing Continental Store Options**
 - Install Sanitize Kit on one unit, aspecific capacity of washers or an entire bulkhead
 - Chemical delivery systems for up to 10 units from a single pump control
